Insights & Strategies

Edge Computing for Logistics in Contested, Multi-Domain Operations

ONE's DISCON capability supports secure and continuous operations during Denied, Disrupted, Intermittent, and Limited (DDIL) periods.

Enabling Strategic to Tactical Success

Learn about the only true tactical to strategic network solution to manage military logistics, built on a unique architecture and designed specifically for multi-echelon defense organizations.

Optimizing the Defense Supply Chain with a Digital Supply Chain Network

Achieve real-time asset and inventory visibility with transactional reporting at the lowest tactical level through smart-sync technology.
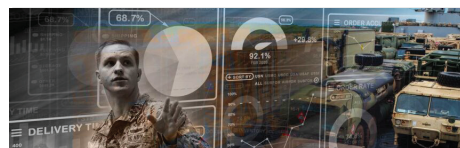

Leveraging Data for Effective Multi-Domain Operations

End-to-end, logistics planning and execution, with AI/ML prescriptions and a deployed/disconnected capability to extend commanders' operational reach.

Why Defense Organizations Need a Joint Ammunition Management System

How a joint ammo management system will enhance visibility and operational readiness, while reducing manual effort.

What an Effective Joint Transportation Management System Looks Like

How a network for JTMS improves functionality, reduces workload, and provides a low cost platform for defense supply chain management.

Insights & Strategies

ONE MRO Solution

A unified solution for Work, Supply Chain, Asset, Contract, and Service Management. Manage the entire maintenance planning process through development, execution, and job completion/certification without costly customization efforts or the baggage of complex sustainment of custom code.

US Air Force Awards $62M Contract to One Network

One Network helps USAF configure and model new Master Data Management business processes to support its logistics initiatives

A Platform for Defense

A multi-party, multi-echelon platform approach to evaluating a Capability Integration Platform (CIP), to enable modernization and flexibility, with "never legacy" guarantee.

SMRO: Innovations in Spares & Maintenance

Comprehensive capabilities for managing the entire Maintenance Planning process, through development, execution, job completion, and certification.

Global Logistics Control Tower

Achieving full end-to-end transportation insight, actionability, and autonomy, with ONE's Intelligent Control Tower for Logistics.

One Network Ammunition Management Solution

Visibility of supply Class V (Ground and Aviation) from initial receipt to expenditure. Connects to and supports virtually any system, ERP, SAP, Oracle, DLMS, MILS. and more.

US Marine Corps Ammunition Management Case Study

How the USMC achieved new capabilitie quickly, while integrating with its legacy systems, as well as those of the US Navy and US Army.
